

## Joint Grease **diamant**<sup>®</sup>

### Graphite Grease

Version: 09.09.2025

#### Areas of application

- Friction pairs under slow loading and high pressure.
- Prevents seals and packings from burning.
- The lubricant protects against corrosion and reduces wear and noise.

#### Properties

- Acid resistant
- Long shelf life
- Color: Black

#### Examples of use

Lubricant and sealant for surfaces and flanges, roller bearings, gearboxes, racks, chains, etc. in construction machinery, cable cars, elevators of all kinds, weirs and machine parts in ocean-going shipping, screw threads, grinding belts, gear smoothness, rope grease, etc. Used as a drilling and grinding additive.

|                          |                        |
|--------------------------|------------------------|
| <b>Base oil</b>          | Naphthenic mineral oil |
| <b>Thickening agent</b>  | Graphite               |
| <b>Dropping point</b>    | 85° C                  |
| <b>Temperature range</b> | o up to +50° C         |

Short-term high-temperature use possible thanks to solid lubricant content.
