

PEGO **diamant**[®]

Diluting agent for water-soluble lapping pastes

Version: 06.08.2025

Areas of Application:

By adding **PEGO diamant**[®], the consistency of any water-soluble **Grinding Paste diamant**[®] can be adjusted continuously to suit the user's requirements.

The water-soluble grinding pastes can still be easily removed with lukewarm rinse water.

Properties:

Enables precise adjustment of consistency

Easy to remove with lukewarm dishwater

Application examples:

If grinding paste is to be applied with a brush or dripped onto the workpiece, it is necessary to dilute the grinding paste, as the preset viscosity is too high for this purpose.

Minor dilutions can also be made with water, but the addition of water can easily lead to non-homogeneous dilutions.
