

Lapping and Polishing Pastes in Cake Form **diamant®**

Application:

Lapping and Polishing Cakes are solid pastes (Cakes of about. 1 kg depending on the variation) suitable for grinding, lapping and polishing with polishing pads, buffers and brushes.

Version: 07.08.2025

Properties:

solid pastes in cake form

7 variations

Usage:

- The blocks are pressed against the rotating polishing disk and will melt on the surface due to frictional heat.
- Thereby the paste is transferred onto the disk and sticking to the disk surface in spite of the centrifugal force, it effects a clean polish.

Variations:

- | | |
|--|------------------------------|
| ❖ Pre-grinding all metals and plastics : | Pre-Grinding Compound |
| ❖ Medium coarseness for metals and plastics: | Brown Compound |
| ❖ noble and soft metals, aluminium: | White-beige Compound |
