

Cutting Grease **diamant**[®]

for machine bores

Version: 09.09.2025

Areas of application

For drilling, cutting, and milling all types of metal, wood, and plastics. Used as rust protection, assembly paste, and sealant when using hemp. Reduces wear and tear and enables a clean cut.

Contains high pressure and rust prevention

Examples of use

For circular and band saws, even those with high rotational speeds, for thread cutting up to 140 kp. Suitable for cutting hardwood, chipboard, and plastics, particularly suitable for aluminum.

Reduces wearing when milling, sawing, drilling (instead of oil). Cardboard tube enables safe and clean working.

Temperature range: -25 to +100 °C

Properties

NLGI 2

Physiologically harmless

Water-repellent

Adhesive

Silicone-free

Pressure-resistant
